

*All People Be Happy*  
foundation

# 2020 Annual Report

*Building a World Where All People Can Be Happy*

## Letter From Our Founders

Dear Friends,

There is no way to sugar-coat it, 2020 was a terrible year for the global community. The **AllPeopleBeHappy foundation** spent the year trying to help as much as we can. Despite the Pandemic, most of the organization we worked with were able to carry on with their program after making modifications to conform with lockdown requirements.

We awarded the first year of our 3-year \$100,000 **AllPeopleBeHappy Challenge Grant** to Green Empowerment to install solar energy systems in health clinics in Uganda. In 2020, they conducted a comprehensive energy assessment on 56 health facilities and identified the top 12 clinics for solar energy system installations.

For our first **Opportunity Projects**, the Foundation initiates a solar energy project in Tanzania. We provided in 2018-2019 solar power to 46 primary schools in the Karagwe and Kyerwa districts in Tanzania. With the help of several major donors, we were able in 2020 to install the same solar energy packages in 36 more rural primary schools.

In 2020, we funded 13 **Project Grants** for work in 10 countries, and these went to *The Tandana Foundation* (Mali), *Saha Global* (Ghana), *Indego Africa* (Rwanda), *Global Emergency Care* (Uganda), *A Breeze of Hope* (Bolivia), *The Superkids Foundation* (Paraguay), *Project Alianza* (Nicaragua, El Salvador) and *Clinica Verde* (Nicaragua), *Village Health Works* and *LifeNet International* in Burundi, *Friends of Nepal Pariwar Foundation*, *Little Sisters Fund* and *Sunsar Maya* in Nepal.

We did not grant any **Volunteer Service Award** in 2020 due to the restrictions on overseas travel. We awarded four **Fellows Program** grants to in-country recipients working in Costa Rica, Dominican Republic, Jordan, and Uganda.

For 2020, we expended \$227,671 in carrying out our five programs. None of this would have been possible without our wonderful supporters, who contributed \$281,234 in 2020 to fund these efforts. Thank you so much for your continuing support of the Foundation's mission. There is no doubt that 2020 was a backward step in reducing Global Poverty, however The Foundation remains committed to "Building A World Where All People Can Be Happy."

Sunny C. Tang  
President

Barbara Steen Tang  
Executive Director

# 2020 Highlights

## Education & Training

### Solar in Tanzania

Installed solar panels at **36** more primary schools in Tanzania to **provide electricity** for lights, TVs, radios, and phone charging.

### A Breeze of Hope

Through workshops and virtual meetings, students, parents, educators, and government professionals in Bolivia were **made aware of sexual violence** and what to do about it.

### Indego Africa

Initiated an **entrepreneurial coaching** and practical implementation of **advanced clothing production and financing techniques** for **180** artisan women in Rwanda.

### Little Sisters Fund

Trained **337** teachers in Zoom meetings on **child-centered teaching methodology** in Nepal.

### The Superkids Foundation

Made physical **booklets of games and spelling exercises** and **audio books** of stories in Spanish and Guarani for Kid Teachers in Paraguay to use in their teaching.

### Project Alianza

In Nicaragua and El Salvador, distributed **2,600** workbooks and school supplies to students, and developed **radio programs** and broadcasted them in **31** school centers.

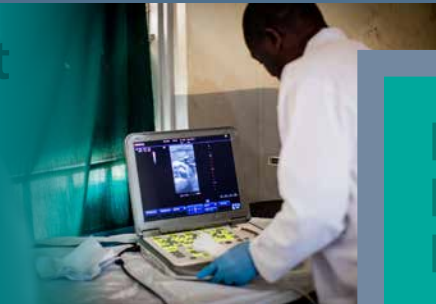

### Sunsar Maya

In Nepal, **73** adult women participated in **digital learning classes** 6 days/week: **36** Jorpati-based students and **37** Mahalaxmi-based students.

## Green Empowerment

Conducted a comprehensive **energy assessment** on **56** health facilities in Uganda and identified the top **12** clinics for **solar energy system installations**.

## Friends of Nepal Pariwar Foundation

Paid the salaries of **2** nurse-midwives in rural Nepal to allow the clinics to provide **24-hour healthcare services**.

## Global Emergency Care

Continued the process of **transitioning management** of the Emergency Care Practitioner (ECP) **training and education program** to local partners.

## Saha Global

Utilizing almost **600** women entrepreneurs, provided **free clean water** to **225** villages in Ghana, with approximately **100,000** residents served.

## LifeNet International

Over the course of one year, provided capacity-building **monthly trainings in medical and management best practices** to staff at a health clinic in Burundi.

## Clinica Verde

Teaching **50** families in Nicaragua to use biointensive gardening methods to **establish 50 3-beds home gardens**.

## Village Health Works

Initiated a **food security strengthening program** to provide **on-site food services** to patients and staff on the campus in Burundi.

## The Tandana Foundation

Built **two school gardens**, at the secondary school of Ondogou and the primary school of Saredina, Mali.

## CHALLENGE GRANTS

### *Green Empowerment*

The **AllPeopleBeHappy Challenge Grant** was designed to be a \$100,000 matching grant distributed over 3 years. The proposed project or program must be a scale up, expansion, or major “step-out” of the organization’s current operations.

A Challenge Grant (\$100,000 over 3 years, 2020-2022) was awarded to **Green Empowerment** for a program to “Improving Healthcare, Education and Agriculture through Renewable Energy Access in Uganda.” This grant will enable Green Empowerment, who has primarily worked in Latin America and Asia, to establish a major presence in Africa by 1) hiring a Uganda Program Coordinator, 2) support a collaborative pilot project with the Power Partnership to provide solar energy to a health facility, 3) complete at least 7 solar installations at health clinics in 3 years, 4) integrate solar energy into other sectors such as education and agriculture, and 5) develop new partnerships to implement community-based renewable energy projects.

In 2020, Green Empowerment completed a comprehensive energy assessment with Medical Teams International (MTI) on 56 health facilities in Uganda, serving over 250,000 patients quarterly. The assessment found that 35 facilities (63%) had “unreliable” or “no access” to electricity, despite offering 24/7 services, along with 24 facilities (43%) that relied on diesel as the primary or secondary energy source. The survey has helped MTI decision makers to understand the current energy demand across their portfolio of clinics. This allows MTI staff to estimate the size and cost of renewable energy to meet the current needs, as well as evaluate future energy needs to assess whether clinics will have sufficient and reliable energy to increase their services to the local refugee and national populations. Additionally, to ensure the biggest impact the analysis incorporated MTI’s priorities to rank health facilities, which identified and prioritized the top 12 clinics for pilot installations. Green Empowerment is now actively pursuing opportunities with MTI to secure financing to install reliable, affordable energy to expand their critical health services.

## OPPORTUNITY PROJECTS

Opportunity Projects are major projects which are initiated by the **AllPeopleBeHappy foundation**. They should be mission critical and achievable in collaboration with partner organizations.

**Solar in Tanzania:** In collaboration with Amazide, Mavuno, and Off Grid Electric (Zola Electric in country), we initiated in 2018 an Opportunity Project to bring solar energy to primary schools in Tanzania. Most primary schools in rural Tanzania do not have electricity, hence teaching is carried out on clear days, without the aid of any electronic equipment. To remedy this, we developed a pilot project to electrify 10 primary schools in the Karagwe District and Kyerwa District of northern Tanzania. This “solar electrification” consists of roof-top solar panels, light bulbs, TVs, radios, and phone charging strips. The installation was completed in the second quarter of 2018 by Zola Electric, and all equipment are guaranteed for 5 years. The schools thus now have electricity essentially cost free for the foreseeable future. In 2019, we increased our commitment to this endeavor and completed the installation in 36 more primary schools (31 in Karagwe District, 5 in Kyerwa District). In 2020, we continued this Opportunity Project and completed the installation in 36 more primary schools (14 in Karagwe District, 22 in Kyerwa District).

We conducted surveys in the schools six months after installation, with the results showing an increase in the quality and quantity of education. Qualitatively, the lights are being used at night by teachers to prepare lessons and tutor students, and by both primary and secondary school students to prepare for national examinations. The televisions and radios are being used as teaching tools. Early morning and night programs have been initiated. Because the schools are now considered “modern,” student attendance, punctuality, motivation, interest, and confidence are all up. Quantitatively, student performance as measured by local and regional examinations are up by an average of 15%.

There are 111 primary schools in the Karagwe and Kyerwa districts, with 82 solarized by the end of 2020. The remaining 29 schools are being solarized in 2021.

## PROJECT GRANTS

### *Education and Training*

**A Breeze of Hope.** A fourth \$10,000 Project Grant has been awarded to A Breeze of Hope Foundation (ABH) in 2020 to support its school-based sexual violence awareness project in Cochabamba, Bolivia. Since 2009, ABH has been changing school cultures and helping those who have suffered sexual violence to disclose the crimes committed against them and begin healing. ABH has reached over 90,000 people through this longstanding effort, most of whom are of low or impoverished socio-economic status. During 2017-2020, A Breeze of Hope 1) conducted 285 workshops in middle and high schools in Cochabamba, reaching 15,903 students, 2,283 parents, 708 teachers, and 757 school-based professionals and justice officials, 2) provided students with current information on their human rights, ways to get help, and the benefits of disclosing sexual violence, and 3) ensured that professionals trained in trauma-informed response are prepared to provide legal assistance, therapeutic support, social services, academic support and advocacy to children who disclose sexual violence during or after workshops.

**Indego Africa,** founded in 2007, is dedicated to empowering artisan women in Africa through employment opportunities and education. The **AllPeopleBeHappy foundation** has been a major supporter of Indego Africa through Project Grants in 2016, 2017, 2019 and a Challenge Grant in 2014-2016 which enabled it to expand into Ghana. In mid-2020, another Project Grant of \$10,000 was awarded to Indego Africa in support of its initiation of the "Artisan Accelerator Program." The program is intended to be an entrepreneurial coaching and practical implementation of advanced clothing production and financing techniques for 180 artisan women in Rwanda. The workshop program consists of 3 phases: 1) Vocational Sustainability Certification: Dyeing, 2) Access to Capital and Knowledge of Microfinance: Igiceri, and 3) Cooperative-Specific Business Goals. The program, taught in two 6-month sessions, will help artisans accelerate the sustainable growth of their businesses by providing working space, hands-on business mentoring and support, direct access to financial capital, and a vibrant community of ambitious artisans and experienced local and international experts.

**Little Sisters Fund.** The Little Sisters Fund (LSF) provides a Primary Educator Training (PET) Program, which seeks to replace the teacher-centered rote memorization learning system with a child-centered teaching methodology. With grants of \$7,500 in 2015, 2016, 2017, 2018, 2019, and 2020 from

**AllPeopleBeHappy** foundation, approximately 50% of the cost of the PET Program is being covered. In 2020, despite the upheaval and uncertainty brought on by the COVID-19 pandemic and subsequent lockdowns in Nepal, the Basic Educator Training Program (previously named the Primary Educator Training Program) led by Sangita, found a way to continue preparing and training teachers in Nepal. During the 2nd quarter of 2020, they suspended the BET program after Nepal entered a nationwide COVID lockdown on March 24 and all schools were closed. The nationwide lockdown ended July 21, 2020 and although local and regional lockdowns continued off and on throughout the summer and fall, they were able to resume BET sessions via Zoom in July. Specifically, 337 teachers participated in 9 Zoom trainings on using 3D models to further students' understanding in areas of social studies, science, mathematics and art, 6 in-person follow-up visits were made to schools prior to COVID-19 lockdowns, and 44 virtual follow-up visits were made via Zoom.

**Project Alianza.** Seasonal migration of coffee farm families exposes children to fragmented education and pervasive child labor. Since 2015, Project Alianza has been building and supporting schools in coffee farming communities in Nicaragua and El Salvador in order to provide children with consistency, quality education. The **AllPeopleBeHappy** foundation has awarded Project Alianza with Project Grants in 2015, 2016, 2019, and 2020. With the start of the pandemic, Project Alianza moved swiftly to implement virtual learning within the Community Allies Program (CAP) in the 25 schools where they work. The **AllPeopleBeHappy** funding was vital in covering the costs of distance literacy learning materials for children and remote trainings. The funds also supported Community Educators' stipends as well as materials for the hygiene component of the program. Project Alianza staff in collaboration with local teachers distributed 2,600 workbooks and school supplies required to complete the workbooks. They developed radio programs and broadcasted them in 31 school centers: Radio Mansión de Luz Fundadora has coverage in four school centers; Radio Stereo Dalia has coverage in 27 school centers. An additional 7 school centers without strong radio transmission used their offline audio files to participate in CAP via WhatsApp. Roughly eight of every ten children who received the workbooks completed them alongside the audio program. They also provided critical health and hygiene training and supplies to poor remote communities.

**Sunsar Maya** is a small non-profit working in Nepal to improve the livelihoods of disadvantaged children and women through community-based services. They directly serve 185 children and women in Mahalaxmi (Lalitpur) and Jorpati (Kathmandu). Two Project Grants were awarded to Sunsar Maya in 2018 and 2019 for its SuMa Women's Literacy Program. This program teaches 100+ women conversation and written English, Nepali, and mathematics. The English skills enable students to use communication devices, i.e., cell phones and computers which use English characters. By building the women's literacy and numeracy skills in their native language, they can more easily manage daily tasks, such as shopping and paying bills, and perform life skills such as navigating government offices, using a bank account, and participating more fully in their communities. In 2020, due to COVID-19, a third Project Grant has been awarded to support SuMa Women's Literacy Program switching to a digital format. The virtual classes, which are supplemented with at-home learning kits that included supplies and practice books/worksheets. Currently, 73 students are participating in digital learning classes 6 days/week: 36 Jorpati-based students and 37 Mahalaxmi-based students.

In addition to digital instruction, they provided regular distributions of emergency food and supplies to help Sunsar Maya students and their communities survive the pandemic. In total, they supported 1,675 individuals through monthly (and bi-monthly) deliveries from April to December 2020. They also ensured their students have access to medical care, including as needed follow-up visits. In the past Sunsar Maya has relied on community-based partners to provide wellness and gynecological exams, which led to an inconsistent schedule of care. In 2020 they fully integrated access to medical care into their program. As a result, all the Women's Literacy students will receive twice yearly exams: a full physical in the summer and a well-woman/gynecological exam in the winter.

**The Superkids Foundation** has an innovative solution for improving education in Paraguay. They mobilize children as agents of change by enlisting 4th-6th grade children as "Kid Teachers" to teach younger kids to learn to read. In 2020, the **AllPeopleBeHappy foundation** awarded a second \$10,000 Project Grant to support the salaries of their seven staff members (two directors and five facilitators). With the arrival of COVID-19, the program was moved on-line, with The Kid Teachers continue their teaching virtually on Zoom. These virtual classes began with facilitators sending videos to engage the youth, making sure to not lose any consistency in teaching. They made their first collection of stories in Spanish and Guarani for Kid Teachers to use in their teaching. They also created audio books in both languages for the children, too. Activities are being sent to kids through WhatsApp, including specific tasks for the day with small training and games from manuals, spelling exercises, and story writing exercises. They were also sent a physical booklet to supplement literacy teachings.

## Health Care

**Friends of Nepal Pariwar Foundation.** For many years, Nepal has had one of the highest rates of maternal mortality in Asia. Friends of Nepal Pariwar Foundation, for the past 11 years, has provided assistance for the salaries of nurse-midwives in four rural clinics in Nepal, and for in-service training and transportation expenses for the nurse-midwives, through the Friends' partner organization in Nepal, BBP-Pariwar. The **AllPeopleBeHappy foundation** has been providing grants to Friends each year from 2010 to 2021. During that time, Friends has 1) added 4 nurse-midwives to the 4 clinics, 2) upgraded the in-patient delivery facilities, and 3) built another remote clinic. Each nurse-midwife provides reproductive health services to an average of 1,400 persons per year, so the addition of 4 nurse-midwives strongly impacts the community.

**Global Emergency Care.** Emergency medical doctors are in short supply in Uganda, Global Emergency Care (GEC) since 2007 has been training nurses to be Emergency Care Practitioners (ECPs) to enable many more patients to receive emergency medical care. In 2020, Global Emergency Care continued the process of transitioning management of the ECP training and education program to local partners. This involves transitioning full management of the ECP Diploma program to Mbarara University of Science & Technology (MUST), and transitioning oversight of the ECP workforce to graduates of the new Master of Medicine Residency Program for Ugandan Emergency Physicians. By January of 2021, 4 emergency care practitioner students at Masaka Hospital have finished classes, completed their exams, and are awaiting the beginning of their final semester of training. Three Masters of Emergency Care students graduated and were retained at MUST to support the management of the ECP training and management and advocacy of emergency care in Uganda. Talks have begun for the opening of an emergency department at Kisoro Hospital in Masaka. Charles Ndyamwijuka, a 2020 **AllPeopleBeHappy** Fellow is overseeing this project in his role as Operations Manager.

**LifeNet International.** In mid-2020, LifeNet International (LN) was awarded a \$10,000 Project Grant from the **AllPeopleBeHappy foundation** to create deep, permanent change in a health facility in the Burundian district of Bugendana. Over the course of one year, LN is providing high-impact, capacity-building monthly trainings in medical and management best practices. A quarterly report explains: "Thank you for your generous support of the Bugendana Clinic...Your compassion enabled more than 2,100 patient visits to be improved over the past three months...we are grateful for the privilege of equipping Bugendana Clinic with the resources they need to provide high-quality, compassionate care to their community. Even in the face of COVID-19, the staff of Bugendana has the privilege of welcoming new life into the world. This last quarter, 129 new babies were born under the care of skilled women and men who had received LifeNet training."

**Saha Global's** mission is to reduce waterborne disease in impoverished rural villages in Ghana where the water supply comes from stagnant ponds. Saha Global sets up entrepreneurial women with a chlorinating business that provides clean water at a price that all can afford. The women are provided with equipment (three 200L drums, one 1,000 liter polytank, metal stand, chlorine tablets, and multiple Safe Storage Container (SSC)) that are given to each participating family. Saha Global trains the women on how to run the business, mentors them over time, and closely monitor the water quality and consumption for 10 years. Since 2017, the **AllPeopleBeHappy foundation** has been supporting Saha Global with annual \$10,000 Project Grants. When the pandemic hit Ghana, Saha Global stopped recruiting new women entrepreneurs and began working on the survival of these businesswomen. Saha Global initiated the Coronavirus Emergency Water Fund (EWF) and began providing free clean water to the villagers. From June 1, 2020 to January 31, 2021, the EWF ran in 225 villages, with approximately 100,000 residents served and almost 600 participating women entrepreneurs. Their latest data show that 1) over 8 million liters of water were treated, 2) recent round of water testing showed 100% of the businesses tested were free of E. coli, and 3) households consumed 6X the amount of water each day during this period than they did in in 2019.

## *Sustainable Agriculture*

**Clinica Verde.** For 2020, the **AllPeopleBeHappy foundation** awarded a \$10,000 Project Grant in sustainable agriculture to Clinica Verde. Clinica Verde's teaches families biointensive gardening methods for planting home gardens that produce high yield nutritious vegetables and legumes to increase food security and support health. The program focusses on families in Boaco, Nicaragua and its surrounding rural communities, an area 55 miles northeast of the capital city of Managua, within the Dry Corridor of Central America which has suffered from ten years of drought and water shortages. Families learn about the complete cycle of food production from planting seeds to harvesting new seed; global warming; environmental protection; organic food; local production of native seed; and nutrition. Over 2020 and 2021, Clinica Verde will teach 50 families to use biointensive gardening methods to establish 50 3-beds home gardens.

**The Tandana Foundation** collaborates with communities in Mali's Bandiagara District on initiatives that address community priorities. In late 2020, the **AllPeopleBeHappy foundation** awarded a Project Grant of \$9,477 to the Tandana Foundation for the creation of two school gardens, at the secondary school of Ondogou and the primary school of Saredina, Mali. These gardens permit students to earn income with which they can purchase school and first aid supplies, enrich educational experience, and provide nutrition to the students. The Tandana Foundation help the students elected management committees to lead their garden efforts, train these committees along with teachers and parent representatives, install fences to protect the gardens from livestock, and purchase seeds, fruit tree seedlings, and tools to get the gardens started.

**Village Health Works.** In late 2020, we awarded a Project Grant to a long-time partner, Village Health Works (VHW); this time to support its food security strengthening program. From November 2020 through January 2021, VHW has continued to develop its strategic approach towards scaling on-site food services to meet the anticipated 15% increase in patients seen on campus with the opening of the Women's Health Pavilion in the second half of 2021. VHW's plans are to build on its established model farmer program to establish a local food procurement system that can not only provide adequate quantities of food for all patients but also create market access for the surrounding small-holder farmers. In anticipation for season B, the 8 hectares of land on-site is being prepped to sow. With bean seeds already available from the previous harvest, they are at the start of the purchasing process for the additional seeds that have been forecasted to meet the needs of the patient population.

## *Directed Grants*

A Directed Grant of \$3,300 was provided to **Amizade** for support of the solar project in Tanzania. GIVE Foundation, Inc. is a US based non-profit organization serving as fiscal sponsors for many organizations working in India. Through GIVE foundation, Inc., we provided a grant of \$1,000 to **ETASHA Society**, which provide employment training to teens and young adults living in the slums of New Delhi. A grant of \$1,000 was made to **Sankara Eye Foundation, USA**. It supports community eye care activities in India by Sankara Eye Care Institutions, which manages 12 hospitals and is the number one free eye care institution covering rural areas in India, and which has carried out over two million free eye surgeries as of 2020.

## VOLUNTEER SERVICE AWARDS

The *AllPeopleBeHappy* foundation began awarding Volunteer Service Award stipend grants in 2010. Applicants are volunteers wanting to give of their time and talent to help people and communities in the developing world find sustainable solutions to the root causes of their poverty. Our awardees are not “voluntourists” who are looking to spend a few weeks of discomfort to expand their own experiences, but rather they are passionate about becoming positive change agents and are willing to spend the time it takes to understand the needs of the communities they will be serving. As of 2019, 147 Volunteer Service Awards have been granted, and we continue to be amazed by the positive outcomes that are the result of these volunteer efforts.

**Due to COVID-19 pandemic restricting overseas travel, we suspended the awarding of Volunteer Service Award in 2020**

## FELLOWS PROGRAM

The *AllPeopleBeHappy* Fellows Program assists 501(c)(3) organizations or their grassroots supported NGO partners in expanding their services and developing local leadership by the hiring of committed individuals.

### *Nicole Chinchilla – Amigos de las Americas*

The *AllPeopleBeHappy* foundation awarded a Fellows grant to **Nicol Chinchilla**, working with Amigos de las Americas in Costa Rica. AMIGOS has traditionally been a service-learning and cultural exchange program for US and Latin American students, but in Jan 2020, it launched a new initiative to expand to year-round programming for Latin American students in Perez Zeledon, Costa Rica. This pilot program is being led by Nicol, who as Amigos Costa Rica Coordinator, teaches leadership development and community engagement concepts to 15-20 youths, and help student teams execute community service projects.

### *Gonal Fransua Charle – Education Across Borders*

**Gonal Fransua Charle** was selected as a 2019-2020 *AllPeopleBeHappy* Fellow, working with Education Across Borders (EAB), a non-profit organization that serves extremely marginalized communities in the Dominican Republic, while providing service-learning opportunities for US youths. Gonal has been working as an Academic Mentor and Project Coordinator. His main responsibilities involve providing logistical support to approximately 100 students who receive EAB’s support for their studies, from primary level through university. Gonal is charged with planning, convening, and directing monthly meetings

of EAB's scholarship students, as well as individual meetings with students in the interims. With the university students, he will work closely with them to aid in their timely registration and advantageous course selection, as well as helping them achieve greater independence with college level study skills and work completion. During 2019-2020, Gonal shepherded 6 students in obtaining their college degrees. The Foundation awarded Gonal a second Fellows grant for 2020-2021.

### *Charles Ndyamwijuka – Global Emergency Care*

The **AllPeopleBeHappy** foundation awarded a Fellows grant to **Charles Ndyamwijuka**, working with Global Emergency Care (GEC) in Uganda. With this grant, Charles, formerly Research Associate and Financial Manager with GEC, was promoted to Operations Manager. In this new capacity, he is tasked with planning, directing, and coordinating GEC's operation in Uganda, which include the teaching and training activities at Mbarara University of Science and Technology, Masaka Regional Referral Hospital, and Nyakibale Hospital. He is expected to also support the opening of new Emergency Departments in Uganda hospitals, three in year one and 9 by year three. These openings will increase access to emergency care for unserved populations to 10,000 patients in year 1 and 60,000 patients by year 3.

### *Duaa Abojesh – Collateral Repair Project*

**Duaa Abojesh** was selected as a 2020-2021 **AllPeopleBeHappy** Fellow, working with Collateral Repair Project (CRP), a non-profit organization working to serve refugees in Amman, Jordan. Originally founded in 2006 to aid Iraqis fleeing sectarian violence, CRP has now expanded its work to serve Syrians, Somalis, Sudanese and Yemenis displaced by conflict. Duaa is serving in the role of Early Childhood Coordinator. In that capacity, she is monitoring the transition of the preschool curriculum to an online format, training teachers and parents on how to do learning activities with children, and working with the Monitoring and Evaluation team to do assessments. For most of 2020, the program was delivered through a combination of Zoom classes (twice weekly) and home-based activities which are designed by the preschool staff but delivered by parents. Each month there is a different theme for activities, for example in November the focus was on the alphabet and counting, and in December they concentrated on developing the children's motor skills and fine movements.
